

Gamida Cell to Present Preliminary Data from Ongoing Phase I NAM-NK Study at AACR International Meeting on Advances in Malignant Lymphoma

June 19, 2018

CAMBRIDGE, Mass., June 18, 2018 – [Gamida Cell](#), a leading cellular and immune therapeutics company, today announced that preliminary data from an ongoing phase I study from the nicotinamide-based natural killer cell expansion, or NAM-NK, program will be presented during the Inaugural AACR International Meeting on Advances in Malignant Lymphoma, held June 22 – 26 in Boston, Massachusetts.

Veronika Bachanova, M.D., Ph.D., hematologist/oncologist at the Blood and Marrow Transplantation and Cellular Therapy Program of the University of Minnesota, and lead investigator of the investigator-sponsored phase I NAM-NK clinical study at the Masonic Cancer Center, will present a poster of early patient outcomes from the study in patients with refractory non-Hodgkin lymphoma and multiple myeloma.

Title: Phase I study of nicotinamide-expanded related donor Natural Killer (NK) cells for the treatment of relapsed/refractory CD20+ non-Hodgkin lymphoma (Abstract: B05)

Session: Poster Session B: Therapeutics and Clinical Trials in Lymphoma 2

Location: Salon F, Boston Marriott Copley Place

Date: Sunday June 24, 2018 11:45 AM – 1:45 PM

About NAM-NK

Gamida Cell applied the capabilities of its NAM-based cell expansion technology to highly functional NK cells to develop NAM-NK, an innate immunotherapy for the treatment of hematologic and solid tumors in combination with SoC antibody therapies. NAM-NK addresses key limitations of NK cells by increasing the cytotoxicity and in vivo retention and proliferation in the bone marrow and lymphoid organs of NK cells expanded in culture. NAM-NK is in phase I development (NCT03019666) through an investigator-sponsored trial in patients with refractory non-Hodgkin lymphoma and multiple myeloma.

About Gamida Cell

Gamida Cell is a leader in cellular and immune therapeutics, dedicated to treating patients with cancer and rare genetic diseases. The company is building a diverse pipeline based on its proprietary NAM technology platform to deliver transformative medicines to patients in need of new treatment options.
